AUTHOR INDEX

Numbers 11–15

	Number	Page
ANDERSON, H. M. (*joint author*), *see* Guttridge, C. G.	15	92
AUSTIN, R. B., Plastic mulches for outdoor tomato crops and a trial of varieties	11	17
BEVAN, W. J., Control of carrot fly in celery	11	51
BLEASDALE, J. K. A., Comparison of glass and plastic materials for the protection of over-wintered lettuce	11	11
—— Growth of tomato seedlings in plastic or clay pots	12	1
BROADBENT, L. and others, Home production of seed for early potatoes 6: Insecticides applied to the soil or tubers	11	40
BROWN, A. (*joint author*), *see* Goodwin, P. B.	14	31
BROWN, E. B. (*joint author*), *see* Peachey, J. E.	13	45
BURT, P. E. (*joint author*), *see* Broadbent, L.	11	40
CHARLESWORTH, R. R., Response of potatoes, kale and carrots to magnesium	14	62
—— (*joint author*), *see* Little, R. C.	15	27
COOPER, A. J. and others, De-leafing of glasshouse tomatoes	11	1
CORKE, A. T. K., Black currant leaf spot: summer spray trials, 1959–64	15	71
DAVIES, A. G. C., Delayed planting of late struck chrysanthamums	14	74
DUGGAN, J. B. (*joint author*), *see* Perrin, Molly E. B.	13	81
FLEGG, P. B. and ROTHWELL, J. B., Trashing of mushroom beds	12	32
—— and others, Methods and rates of spawning mushroom beds	14	1
FRITH, L. H. (*joint author*), *see* North, C.	12	92
GARTHWAITE, JEAN M., Asparagus trials at Luddington	13	59
GOODING, H. J., The National apple collection: a classification problem	15	38
GOODWIN, P. B. and others, Effect of centre of production and maturity of seed tubers on yields of early potatoes	14	31
GREEN, C. D. (*joint author*), *see* Peachey, J. E.	13	49
GREEN, J. A. and STOCKHAM, T., Orchard swards on boulder clay	15	52
GREET, D. N. (*joint author*), *see* Peachey, J. E.	13	49
GUTTRIDGE, C. G. and others, Cold storage of strawberry runner plants at different temperatures	12	38
—— The control of strawberry runners in the field with CCC.	15	92
HAINE, N. MARGARET and PROCTOR, P., Tomato varieties under cold glass	13	1
HARRISON, D. J. (*joint author*), *see* Salter, P. J.	13	69
HEATHCOTE, G. D. (*joint author*), *see* Broadbent, L.	11	40
HOBBIS, E. W. (*joint author*), *see* Ingram, J.	15	1
HOGG, W. H., Lath shelter screens for lettuce at Stockbridge House	11	23
HUGHES, HILARY M., Strawberry varieties for annual field cropping	12	59
—— Investigations on the pollination of black currant var. Baldwin	14	13
—— Mulching black currant rows with farmyard manure	15	65
—— and IVENS, G. W., Use of simazine on young strawberry plants	12	51
———— Use of chloroxuron and simazine on young strawberry plants	14	18
—— (*joint author*), *see* Roach, F. A.	15	77
ING, E. G., Nitrogen top dressing of Arran Pilot potatoes in early areas	13	65
—— Cutting of Arran Pilot seed potatoes and size of seed	14	39
—— (*joint author*), *see* Guttridge, C. G.	12	38
———— *see* Roach, F. A.	15	77

	Number	Page
INGRAM, J., Bulk handling and storage of apples	15	9
—— Effect of ventilation in bulk bins on the incidence of storage scald	15	23
—— and HOBBIS, E. W., Apple planting systems	15	1
—— (*joint author*), *see* Schofield, Elizabeth R.	14	25
IVENS, G. W., Strawberry herbicide trials at Luddington 1958–61	12	42
—— Strawberry herbicide trials at Luddington; comparison of simazine with 2, 4-DES and chlorpropham	15	96
—— (*joint author*), *see* Hughes, Hilary M.	12	51
—— *see* Hughes, Hilary M.	14	18
JARY, CATHERINE L., Control of basal spikes of hop downy mildew	11	59
JOHN, MARGARET, E. (*joint author*), *see* Light, W. I. St. G.	13	51
JONES, D. A. G., Tomato propagation I. Type of bench and plant container	13	11
JUBB, S. (*joint author*), *see* Flegg, P. B.	14	1
LARGE, J. G., Spacing of tomatoes on the propagation bench	13	6
—— Tomato propagation II. Temperatures and planting stage for the November sown crop	13	17
—— (*joint author*), *see* Cooper, A. J.	11	1
LENNARD, J. H. (*joint author*), *see* Goodwin, P. B.	14	31

SUBJECT INDEX

Numbers 11–15

	Number	Page
Acaricides to control bulb scale mite on narcissus	11	70
Advisory Committee on Poisonous Substances	13	57
Air temperature, effect of glazing materials in frames on	11	12, 15
—— measurement in frames	11	13, 15
—— monitoring in glasshouses	13	18
American gooseberry mildew, assessment on fruit	14	26
—— assessment on shoots	14	25, 26
—— control of	14	25–30
—— incidence on unsprayed plots	14	28
Analysis of Efford soil type 2	12	52
Antirrhinum, cultivation in frames	13	96
—— cut flower production	13	89–97
—— damping-off in seedlings	13	90
—— effect of supplementary illumination on growth and flower initiation	13	89–93
—— effect of temperature on growth	13	89
—— F_1 hybrids	13	89, 93–95
—— production in U.S.A.	13	90
—— propagation of	13	90, 91
Aphid, control of, on potatoes	11	40–44
—— control of, on strawberries	12	60
—— control of, on tomatoes	11	19
Aphid trap	11	41
Apparent specific gravity of soil, determination of	13	70
Apples, National collection of varieties	15	38–46
—— propagation out-of-season	12	36
—— culinary, effect of container on rate of cooling in store	15	24
—— —— moisture loss in store	15	25
—— —— storage conditions for	15	24
—— —— storage in bulk bins	15	23–26
—— —— storage scald in	15	24–26
—— dessert, bruising during picking and storage	15	12–24
—— —— bulk handling	15	9, 10, 21
—— —— cost of orchard containers	15	9
—— —— *Gloeosporium* rot	15	14
—— —— grassing down	15	2
—— —— grassing down orchards on clay soils	15	52–56
—— —— mouse damage to trees	15	53
—— —— mulching of trees	15	53
—— —— nitrogen content of leaves	15	30, 36
—— —— nitrogen manuring	15	27–32
—— —— planting systems	15	33–37, 50
—— —— storage	15	1–8, 50
—— —— —— containers	15	9–22
—— —— —— moisture loss	15	10–12, 14–18
—— —— pruning	15	17, 18
—— —— rootstocks	15	2
—— —— tree thinning, effect on yield	15	3–7, 50
—— —— yields of varieties	15	3, 47–51
—— —— urea sprays	15	4
—— varieties, characters used for identification	15	27–32, 33–37
—— —— classification of	15	41
Asparagus, all-male lines	13	38–46
—— flat and ridged beds	13	59
—— grades of spears	13	62
—— spacing, effect on quality of spears	13	59
—— variety trials	13	59, 60
—— weed control	13	60
	13	61

	Number	Page
Bean, French, effect of irrigation on yield	14	57
—— effect of petroleum mulch on emergence	14	46
—— effect of petroleum mulch on yield	14	57
—— pre-emergence herbicides	14	53
Beetroot, effect of methods of tillage on yield	12	82
Bird damage, protection of trial plots	12	60
Bituminized clay pots, water loss from	12	2
Black currants, effect on yield of fungicides	15	73
—— herbicides	15	65
—— leaf ash analysis	15	67
—— leaf spot, assessment of infection	15	72
—— —— effect of mulches on infection	15	67
—— —— effect of pruning on infection	15	63
—— —— fungicides to control	15	71
—— —— spray trials	15	71–76
—— manuring	15	65
—— mulching with farmyard manure	15	65–70
—— suggested nutrient levels for leaves	15	69
—— pollination	14	13–17
—— pruning trials	15	57–64
—— 'running-off'	14	13
Blueberries, cultivation of	13	81–88
—— dieback caused by *Botrytis*	13	82, 85
—— varieties	13	81, 87
Botytris on blueberries, cause of dieback	13	82, 85
—— on outdoor lettuce	11	27, 31
—— on strawberries, control of	15	78
—— —— occurrence	12	55, 56
————————	13	79
————————	14	23
————————	15	93
—— —— varietal susceptibility	12	64
————————	15	77, 82–91
—— *cinerea* on cold stored strawberry plants	12	39
Bremia lactucae	12	23
British Food Manufacturing Industries' Research Association, taste testing of processed strawberries	15	100
Broad beans, effect of petroleum mulch on yield	14	54
Broccoli, methods of tillage, effect on yield	12	82
Brussels sprouts, cultural techniques	12	92–102
—— quality grading assessment	12	95
Bulb fly, control on narcissus	13	98
Bulb scale mite, assessment of infestation	11	71
—— control	11	69
Bulk bins, construction	15	10
—— handling in orchard	15	18
—— storage of apples	15	9–22
—— —— construction	15	23
—— —— ventilation	15	10, 20
—— storage of culinary apples	15	23–26
Bulk handling of apples	15	9, 10, 21
Bulky organic manures, effect on water capacity of a sandy loam	13	69–75
Bumble bees as pollinators	14	13
Cabbage root fly, assessment of infestation	13	51, 54
—— control on autumn cauliflower	13	51–58
Cabbage, spring, effect of cultivations on root development	12	79
—— effect of cultivations on yield	12	78
Carrots, effect of petroleum mulch on seedling emergence	14	46, 51
—— effect of petroleum mulch on yield	14	57, 58
—— effect of plant density on root size	14	57
—— nutrients removed from soil by crop	14	71
—— pre-emergence herbicides	14	53
—— response to magnesium	14	62–73
—— frame grown, effect of fumigant herbicide	11	35
Carrot fly, control of on celery	11	51–58
Cauliflower, effect of petroleum mulch on seedling emergence	14	46
—— autumn, control of aphis	13	54

	Number	Page
—— control of cabbage root fly	13	51–58
—— insecticide dips at planting out	13	53, 54
—— insecticide treatment of seed beds	13	52
—— phytotoxicity of insecticides	13	55
Celery, control of carrot fly	11	56
—— magnesium deficiency	14	63
Celery fly	11	56
Cellulose acetate, film for glazing	11	12
Charcoal dip prior to planting strawberries	12	57
———	14	23
Chemical sterilization of soil	11	7
Chlorosis of strawberries, *see* Strawberry		
Chrysanthemum, comparison of potting dates	14	75
—— direct planting	14	74
—— potting containers	14	77
—— potting methods	14	74, 75
—— time of planting	14	74–84
Cladosporium fulvum, *see* Tomato leaf mould		
Clay pots compared with plastic pots	13	11
—— for tomato propagation	12	1–5
Cloches, varieties of strawberries for	15	77–81
Cold storage of strawberry runners	12	38–41
Colletotrichum atramentarium	12	13
Corynebacterium michiganense, *see* Tomato bacterial wilt		
Cultural methods for Brussels sprouts	12	92–102
Daffodils, *see* Narcissus		
Dagger nematode, assessment of infestation level	13	45
—— control of in glasshouses	13	45–48
———	13	49–50
Damping off in antirrhinum seedlings	13	90
Day length, regulation of	13	90
Diamond-back moth	13	54
Didymella, tomato rootstock resistant to	12	7
Downy mildew on hops, control of	11	59–63
Dutch light frames, for cultivation of antirrhinums	13	96
—— glazing materials	11	11–16
—— weed control in	11	34–39
—— structures, tomato varieties for	13	1
Early potatoes, *see* Potatoes, early		
Eelworm, potato root	11	7
———	12	10
—— root-knot	12	19
Efford soil type 2, mechanical analysis of	12	52
Erioischia brassicae, *see* Cabbage root fly		
Farmyard manure, effect on soil organic matter	13	31
—— effect on water capacity of soil	13	70
—— effect on yield of tomatoes	13	43
—— for mulching black currants	15	65–70
Fibre-glass, for glazing Dutch lights	11	12
Field capacity of soil, assessment of	13	70
Frames, Dutch light *see* Dutch light frames		
French bean, *see* Bean, French		
Frost damage, on dessert apples under various planting systems	15	6
Fungicides, to control American gooseberry mildew	14	25
—— to control black currant leaf spot	15	73
Fusarium wilt, tomato rootstock resistant to	12	7
Glasshouse Crops Research Institute, quality assessment of tomato varieties	13	5
—— survey of tomato varieties	13	1
—— tomato rootstocks produced by	12	10
—— trial on de-leafing tomatoes	11	1

	Number	Page
Glasshouse soils, effect of conditioners on available potassium	13	28, 33
—— effect of conditioners on available phosphorus	13	28, 32
—— improvement of physical condition	13	24–44
—— phosphorus levels in	13	24
Gloeosporium on stored apples	15	14
Gooseberries, control of American gooseberry mildew	14	25–30
—— cost of fungicidal applications	14	29
Graft wood, storage of apple and pear	12	36
Grafting techniques, for out-of-season propagation of apples and pears	12	36
—— for tomatoes	12	7, 17
Grassing down apple orchards	15	52–56
—— persistence of species	15	55
—— admixture of clover	15	55
Growth retardant, application to control runners on strawberries	15	92–95
Herbicides, cost of application compared with hand hoeing	12	57
—— effect on weeds	12	53
————————	14	19
————————	15	96–99
—— technique for applying standard rate	12	44
—— on asparagus beds	13	61
—— on black currants	15	65
—— on carrots, pre-emergence	14	53
—— on French beans	14	53
———————— pre-emergence	14	53
—— on onions, pre-emergence	14	53
—— on strawberries	12	42–50
————————	12	51–58
————————	14	18–24
————————	15	96–103
———————— comparison with hand weeding	12	42
———————— phytotoxicity	14	21
————————	15	100
—— weed spp. controlled	12	46
Heterodera rostochiensis, *see* Potato root eelworm		
High pressure mercury vapour lamps	13	91
Hoeing of strawberries, cost compared with use of herbicides	12	57
—— effect on crop	15	99
—— labour requirement compared with use of herbicides	15	99
Honey bees as pollinators	13	14
Hop downy mildew, control of basal spikes	11	59–63
Hot water treatment of narcissus bulbs	13	98–102
Illumination of plants, comparison of light sources	13	91–93
Incandescent lamps for illumination of plants	13	91
Insect pollinators	14	13, 17
Insect-proof cages	14	13
Insecticides, applicator for granules	11	42
—— for control of cabbage root fly	13	51
—— systemic, soil applied to control aphis	11	40–42
—— phytotoxicity on cauliflower	13	55
Irrigation, of French beans	14	57
—— of outdoor lettuce	14	56
—— of radish	14	54
—— of strawberries	12	52
————————	12	60, 62
————————	15	78
—— equipment, preventing corrosion of	11	31
—— system, for tomatoes under cold glass	13	2
Kale, nutrients removed from soil by crop	14	70
—— response to magnesium	14	62–73
Kipp solarimeter	13	22, 23
Krilium soil conditioner	13	24

	Number	Page
Lettuce, frame grown, effect of a fumigant herbicide on	11	35
—— outdoor, *Botrytis* infection on	11	27, 31
—— —— irrigation	11	30
—— —— —— application of fertilizer with	11	29–33
—— —— —— effect on marketable yield	14	56
—— —— lath shelter screens for	11	23–28
—— —— petroleum mulch, effect on seedling emergence	14	46
—— —— —— effect on marketable yield	14	56
—— overwintered, frame protection of	11	11–16
—— spring varieties	12	22, 23
—— summer varieties	12	21, 22
—— winter, breeding improved varieties	12	21–31
——————effect on yield of methods of tillage	12	79, 80
—— winter-forcing varieties	12	22, 23
Light sources, comparison for illumination of plants	13	91–93
Light transmission of plastics	11	15
Lycopersicon spp.	12	6
Magnesium, application to carrots	14	62–73
—— application to glasshouse tomatoes	13	2
—— application to kale	14	62–73
—— application to potatoes	14	62–73
—— available content of soil	13	33, 36
————————	14	69
—— causes of inadequate uptake	14	62
—— content of tomato fruits	13	30
—— content of tomato plants	13	29
—— deficiency, in celery	14	63
—— —— in grafted tomato plants	12	16, 18
—— —— general symptoms	14	62
—— determination of level in soil	14	62, 63
—— limiting soil values	14	62, 63
—— requirement of tomato crop	13	41, 42
—— sources of	13	33
————————	14	71
Manganese, toxic levels following steam sterilization	13	24, 39
Meloidogyne spp., *see* Rootknot eelworm		
Mildew, American gooseberry, *see* American gooseberry mildew		
Moisture capacity of soil, effect of conditioners on	13	40
Moisture release characteristic of soil	13	72
Mulch, black polythene	14	43
—— —— for outdoor tomato crops	11	17–22
—— farmyard manure, effect on available nutrients	15	68
—— —— effect on soil moisture	15	68, 69
—— —— for black currants	15	65–70
—— petroleum, effect on seedling emergence	14	44–52
—— —— effect on soil moisture and temperature	14	44, 48–50
Mulches for blueberries	13	83
Mushroom, methods of picking	12	32
—— types of spawn	14	1
Mushroom beds, casing mixtures	12	32
—— —— effect of depth on yield	14	10
—— —— effect of disturbance on yield	12	34
—— —— methods of spawning	14	1–12
—— —— —— definitions	14	2
—— —— —— effect on yield	14	6, 7
—— —— rates of spawning	14	1–12
————————	12	32
—— —— —— effect on yield	14	3, 5
—— —— trashing	12	32–35
Myzus persicae on potatoes	11	42
Narcissus, control of bulb scale mite	11	69–77
—— damage to bulbs caused by dalapon	11	64–68
—— hot water treatment of bulbs, effect of date on flower production	13	100
—— —— pre-soaking prior to	13	98–102
—— —— stage for	13	98

	Number	*Page*
—— methods of tillage, effect on crop	12	82
National Institute of Agricultural Engineering, aspirated screens	13	18
—— design of bulk bins	15	9
—— temperature integrating jars	13	18
Nitrogen, content of apple leaves	15	30, 31
—— content of black currant leaves	15	67
—— content of tomato fruits	13	30
—— content of tomato plants	13	29
—— determination of content in leaves	15	34
—— requirement of tomato crop	13	41, 42
—— time of application to apple trees	15	28–31
—— top dressing, for Brussels sprouts	12	95, 96
—— —— for early potatoes	13	65–68
Onions, methods of tillage, effect on yield	12	80, 81
—— petroleum mulch, effect on seedling emergence	14	46–51
—— pre-emergence herbicides	14	53
—— dry bulb, petroleum mulch, effect on yield	14	55, 56
—— salad, petroleum mulch, effect on yield	14	54
Pear, classification of perry varieties	15	42
—— propagation out-of-season	13	36
Peas, methods of tillage, effect on yield	12	81, 82
—— petroleum mulch, effect on seedling emergence	14	46
—— —— effect on yield	14	58
Permanent wilting point of soil	14	48
—— assessment of	13	70
—— indicator of	13	40
Petroleum mulch, application of	14	45
—— effect on seedling emergence	14	43, 53
—— effect on soil moisture and temperature	14	44, 48–50
—— effect on soil structure	14	59
—— effect on yield of vegetable crops	14	53–61
—— method of application	14	60, 61
—— rate of application to seed bed	14	53
Philophylla heraclei, *see* Celery fly		
Phosphorus, content of black currant leaves	15	67
—— content of tomato fruits	13	30
—— content of tomato plants	13	29
—— effect of soil conditioners on availability	13	28, 32
—— requirement of tomato crop	13	41, 42
Phytophthora infestans, *see* Tomato late blight		
Plant pots, effect of size on soil temperature	13	13
—— effect of type on soil temperature	13	13
—— effect of type on water requirement	13	14, 16
Plant Varieties and Seeds Act, 1964, distinguishability of varieties	15	38
Planting systems for dessert apples	15	6
Plastic film, light transmission of	11	15
Plastic pots, comparison with clay	13	11
—— for propagation of tomato plants	13	1–5
Plutella maculipennis, *see* Diamond-back moth		
Pollination of black currants	14	13–17
Polystyrene pots	13	11
Polythene film, for glazing Dutch lights	11	12
—— black, as mulch	11	17
——	14	43
—— —— effect on soil moisture and temperature	11	19–21
Potassium, content of black currant leaves	15	67
—— content of tomato fruit	13	30
—— content of tomato plants	13	29
—— effect of soil conditioners on availability	13	28, 33
—— requirement of tomato crop	13	41, 42
Potato root eelworm, *see* Eelworm, potato root		
Potatoes, insecticidal treatment of seed tubers	11	41–49
—— nutrient requirement of crop	14	70
—— response to magnesium	14	62–73
—— early, chitting of seed	14	36–39

	Number	Page
—— —— cut and whole seed, comparative effect on yield	14	40, 41
—— —— depth of planting	14	37, 40
—— —— 'little potato' virus, effect on rate of bulking	14	33
—— —— methods of tillage, effect on yield	12	83
—— —— nitrogen top-dressing	13	65–68
—— —— planting rate and spacing	14	39–41
—— —— production of seed	11	40–50
—— —— size of seed tubers, effect on crop	14	39–42
—— —— source and maturity of seed, effect on yield	14	31–38
—— —— storage of seed tubers	14	32
—— viruses, control of spread	11	40, 45
—— —— transmission by aphids	11	44, 45
Potato root eelworm	13	4
———— estimating kill of	11	7–10
Propagation, of apples and pears	12	36
—— benches, slatted compared with solid	13	12–14
Pruning, of black currants	15	57–64
—— of blueberries	13	83
Pseudopeziza ribis, *see* Black currant leaf spot		
Psila rosae, *see* Carrot fly		
PVC film, for glazing Dutch lights	11	12
Radish, irrigation, effect on yield	14	54
—— petroleum mulch, effect on crop	14	54
Red core of strawberries, *see* Strawberry red core		
Root-knot eelworm	12	19
Rootstocks, for dessert apples	15	3–7, 50
—— disease resistant for tomato plants	12	6–20
Rosa canina rootstocks	13	45
Roses, effect of soil sterilants on blooms	13	46, 47
—— infestation with dagger nematode	13	45, 50
—— treatment of plants with soil fumigants	13	49
Rotary cultivation, effect on soil structure	12	72, 87
—— effect on weed growth	12	84
Salad onions, *see* Onions, salad		
Seedling emergence of vegetables, effect of soil moisture	14	50
Soils, glasshouse, *see* Glasshouse soils		
—— moisture capacity	13	40
—— —— effect of organic manures on	13	71
—— moisture release characteristic	13	72
—— permanent wilting point	14	48
—— sterilization with chemicals	11	7
—— tillage, response of vegetable crops to different methods	12	72–91
Solarimeter, Kipp	13	22, 23
Spacing of asparagus	13	59, 60
Spring cabbage, *see* Cabbage, spring		
Storage, of apple and pear graftwood	12	36
—— of culinary apples in bulk bins	15	23–26
—— of dessert apples	15	9–22
—— —— containers for	15	10–12, 14–18
—— —— moisture loss	15	17, 18
—— of early potato seed tubers	14	32
—— scald in culinary apples	15	24–26
Straw, wheat, effect of applications on soil organic matter	13	31
Strawberries, control of runners with CCC	15	92–95
—— grade standards for fruit	13	76
————	15	82–83
—— herbicide trials	12	42–50
————	15	96–103
—— —— on young plants	12	51–58
————	14	18–24
—— herbicides, charcoal dip to reduce damage	12	57
————	14	23
—— irrigation	12	52, 60, 62
————	15	78

	Number	Page
—— manuring	15	77, 78
—— non-cultivation, effect on growth	12	49
—— planting date, effect on yield	14	21
—— protection of trial plots against bird damage	12	60
—— runners, cold storage of	12	38–41
—— varieties, for annual field cropping	12	59–71
—— —— quality assessment	12	67
—— —— susceptibility to *Botrytis*	12	64
————	15	77, 82–91
—— —— under cloches	15	77–81
—— —— yield from matted and spaced rows	13	76–80
—— variety trials, preliminary	15	82–91
—— virus-free clones	13	76
—— waste fruit, causes of	15	83
Strawberry aphid, control of	12	60
Strawberry mildew, control of	15	78
Strawberry red core, varietial resistance to	12	70
—— varietial susceptibility to	12	70
————	15	81
Structures, Dutch light, *see* Dutch light structures		
Systemic insecticides, *see* Insecticides, systemic		
Taste testing of processed strawberries for taint	15	100
Temperature, air, effect of glazing materials in frames on	11	12, 15
—— measurement in frames	11	13, 15
—— monitoring in glasshouses	13	18
Temperature integrating jars	13	18
Tillage, response of vegetable crops to different methods	12	72–91
Tomatoes, chemical composition of fruit and plants	13	5, 27–30
—— disease resistant rootstocks for	12	6–20
—— effect of de-leafing on crop	11	1–6
—— effect of soil conditioners on crop	13	24–44
—— manganese toxicity in plants following steam sterilization of soil	13	38–39
—— nutrient requirement of crop	13	41
—— occurrence of magnesium deficiency in grafted plants	12	16, 18
—— plastic mulches for outdoor crops	11	17–22
—— propagation, effect of plant spacing on truss abortion	13	6, 9
—— —— effect of pot size on yield	13	16, 19, 20
—— —— effect of stage of planting on yield and quality	13	19, 20
—— —— growth of seedlings in plastic compared with clay pots	12	1–5
—— —— importance of adequate light	13	22
—— —— plant containers for	13	11–16
—— —— planting stage for November sown crop	13	17–23
—— —— spacing of plants	13	6–10
—— —— temperatures for November sown crop	13	17–23
—— —— type of bench for	13	11–16
—— varieties, flavour assessment	13	4
—— —— for cold glasshouses	13	1–5
—— variety trial, outdoor crop	11	17–22
Tomato and Cucumber Marketing Board, grades of fruit	11	2
Tomato bacterial wilt, control of seed-borne	11	18
Tomato leaf mould, control of	13	2
———— occurrence	12	9
———— varietal resistance to	13	5
Tractor ploughing, effect of depth on weed growth	12	84
———— effect on soil structure	12	72
Trap, for aphids	11	41
Urea foliar sprays, application to apple trees	15	27–33
———— preparation of	15	34
Vaccinium corymbosum, *see* Blueberry		
Vegetables, effect of soil moisture on seedling emergence	14	50
—— response of crops to methods of soil tillage	12	72–91

	Number	*Page*
Water capacity of soil, effect of organic manures	13	71
—— requirement of clay compared with plastic pots	13	14, 16
—— requirement of tomato crop, calculation of	13	27
Watering by hose, effect on condition of glasshouse soils	13	24
Weed control in Dutch light frames	11	34–39
—— growth, effect of methods of tillage on	12	84–86
Weeds, effect of herbicides on	12	53
————————	14	19
Wetting agents for pre-soaking narcissus bulbs	13	98–100
Wind breaks	11	23–28

Xiphinema diversicaudatum, *see* Dagger nematode

Zythia fragariae, cause of rotting on strawberries | 14 | 23

Printed in England for Her Majesty's Stationery Office, by Elliott Bros. & Yeoman Ltd., Liverpool
2769 Dd. 142448 K 15 1875 12/68 Gp 474
